Index

Preface 11

1 Introduction to Green Belt 15
What is Six Sigma?
Tools and methodology
Six Sigma structure

2 Project definition 25
Project planning
and documenting
Project charter
Project Gantt chart

3 Voice of the customer 37
3.1 Kano model 41
3.2 Critical to Quality
(CTQ) Tree 47
3.3 Quality Function
Deployment (QFD) 53

4 Process maps 63
What are process maps used for?
Types of process maps

5 Measurement System Analysis (MSA) 85
What is MSA?
When is it used?
Key concepts

6 Basic statistics 103
What is statistics?
Reasons to apply statistics
Branches of statistics
Properties of data

7 Sampling 117
What is sampling?
What is it used for?
Types of sampling
When is it used?

8 Histograms 133
What is a histogram?
What is it used for?
Components
When is it used?

9 Process capability 145
What is process capability?
Why measure it?
Capability measurement
When do you measure it?

10 Process performance 165
Process performance
Process yield
Defects Per Million Opportunities (DPMO)
Six Sigma metric
Integrative example

11 Box plots 189
What is a box plot?
What is it used for?

12 Multi-vari analysis 197
What are multi-vari charts?
What are multi-vari charts used for?
Sources of variation
When are multi-vari charts used?

13 Hypothesis testing and confidence intervals 205
What is hypothesis testing?
Elements of hypothesis testing
Confidence levels
What are confidence intervals?
What are confidence intervals used for?
When are its used?

14 Analysis of variance (ANOVA) 231
What is ANOVA?
Key elements
Types of ANOVA

15 Correlation 259
What is correlation?
What is it used for?
Correlation diagram
Types and strength of relationship
Interpretation of results
When is it used?

16 Introduction to design of experiments 271
What is Design of Experiments (DoE)?
DoE applications
Classification of DoE

17 Factorial experimental designs 285
Factorial designs
Sample size
Types of factors

18 Statistical process control . . . 303
What is statistical process control (SPC)?
What are they used for?
Benefits
Elements
When to use them?
Re-calculation of control limits

19 Control plan 333
What is a control plan?
What is it used for?
Key elements
When is it used?

Glossary 345
